ABOUT ME

My job is to build your website so that it is functional and user-friendly but at the same time attractive. Moreover, I add personal touch to your product and make sure that is eye-catching and easy to use. My aim is to bring across your message and identity in the most creative way.

MARK ANDRO MAGTOTO

FRONTEND-WEB DEVELOPER

JOBS EXPERIENCE

LB Solutions
Front End Web Developer

2023- 2024

Task

Front-End Framework: Use a modern front-end framework/library such as Nuxt.js, or Implement a responsive design using a CSS framework of your choice (e.g., Bootstrap, Tailwind CSS).

API Integration: Integrate with a RESTful API.
public API or set up a mock API using tools like JSON Server or MirageJS.The API should allow the following operations on user profiles:Create a new user Retrieve a list of users Update a user's information Delete a user

User Interface: Create the following views/pages:A list view to display all usersA detailed view to show a single user's profileA form to create a new userAn edit form to update existing user informationImplement navigation between these views.

State Management: Manage the application state effectively, handling API data and UI state.
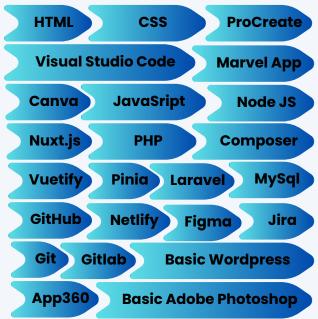

Error Handling: Implement error handling for the API requests.Show appropriate feedback to the user in case of API failures.

Bonus Features: Add client-side validation to the user forms.Implement pagination or infinite scrolling for the user list view.Add a search feature to filter users in the list view.

Documentation:A brief documentation outlining the design choices, libraries used, and any assumptions made during development.
